CLIMATE CHANGE 2010-2011

[Back to List of Programs](#)

HIGHLIGHTS: The Gulf of Maine Council's Climate Change Network will serve as an Information Sharing Resource Center of Climate Change issues for the Atlantic US/Atlantic Canada.

SECURED FUNDING

Stated in US Dollars
(Indirect Included)

Expense

| | |
|--------------------------|-----------|
| A. Technical assistance | \$11,659 |
| B. Policy maker outreach | \$124,354 |
| C. US/CA coordination | \$40,806 |

Total Expense \$176,819

Income

Total Income \$0

FUNDS NEEDED \$176,819

Expenses

Expenses v. Income

OVERVIEW

Program Description

The Climate Change Network (the Network) strives to bring the latest climate change science, impacts, and adaptation information to the Gulf of Maine community and the larger region of the Atlantic US and Atlantic Canada. The goals of the Network are to enhance awareness of how climate change will impact the Gulf of Maine and Atlantic region, help those working on other environmental issues to understand how climate change will influence their decision-making, work toward joint adaptation strategies, and facilitate networking and communication between various groups, agencies, and academics.

More Info

Deliverables

- ID and convene key players to serve on Steering Committee
- Collaborate and communicate across US and Cdn partners on existing initiatives and lessons learned
- Inventory existing needs assessments for climate information
- Deliver climate change information through workshops, webinars, and annual conference.

Strengths: Facilitates the networking of all bi-national parties interested in climate change.

Weaknesses: Both labor and resource intensive in order to maintain and grow those network opportunities.

Opportunities: Networking will identify and expand knowledge of climate change impacts on Gulf of Maine.

Threats: Lack of pertinent region-specific knowledge. Need relevant, high-level, bi-national participation.

Action Plan

List how program corresponds with the AP

- 1.17 Conduct risk analysis and prioritize the vectors of invasive species and understand the effects of climate change.
- 1.18 Convene stakeholder workshops to identify and promote mitigative and adaptive strategies for dealing with sea level rise and changes in water quality related to climate change.
- 1.20 Enhance the climate change module of the Council's on-line KnowledgeBase by compiling programs, best practices and other information.
- 1.21 Investigate and propose regional climate change adaptation strategies

- 1.22 Initiate the Climate Change Network and coordinate Climate Change Action Plan Activities for years one and two.
- 1.5 Prepare regional criteria to identify coastal habitats at risk from sea level rise and other climate change impacts; integrate into habitat restoration decision-making.
- 1.6 Compile and disseminate information on coastal habitats and watersheds at risk due to climate change.

Linkages

Internal: All subcommittees. Network is a cross-cutting committee.

External: US Feds including: EPA, NOAA, DOI, DofAg, others.

Canadian Feds: EC, DFO, others. State and provincial agencies from US SC to Newfoundland.

ECOSYSTEM INDICATOR PARTNERSHIP

2010-2011

[Back to List of Programs](#)

HIGHLIGHTS: ESIP has released three factsheets: ESIP, Aquaculture and Climate Change. Hands-on workshops planned for April and October 2011 to engage coastal managers and get evaluation to improve the Indicator Reporting Tool. Ready to design ESIP 2.0 to increase outreach and expand indicator sets.

SECURED FUNDING

Stated in US Dollars
(Indirect Included)

Expense

| | |
|----------------------|-----------------|
| A. Program Manager | \$80,344 |
| B. Web Services | \$5,958 |
| Total Expense | \$86,302 |

Income

| | |
|--------------------------------|-----------------|
| A. USGS | \$68,702 |
| B. EC (Contribution Agreement) | \$14,080 |
| C. DFO | \$3,520 |
| Total Income | \$86,302 |

FUNDS NEEDED **\$0**

Expenses

Expenses v. Income

OVERVIEW

Program Description

ESIP will complete indicator themes (climate change, aquatic habitats, aquaculture, contaminants, and eutrophication) and accelerate coastal development and fisheries. ESIP is currently moving to a second phase where tools are evaluated by managers and decision-makers. In addition, will begin to re-evaluate tier two indicators and develop work plans to incorporate them into the ESIP tools. A stable base has been established for the Program Manager and web services; new efforts ongoing to find funds for outreach and evaluation.

More Info

[Click to Visit Web Site](#)

Deliverables

- Release of general fact sheet (July 2009)
- Release of revised Indicator Reporting Tool (July 2009)
- Release of Aquaculture fact sheet (January 2011)
- Release of climate change fact sheet (February 2011)
- Release of habitat extent fact sheet (Summer 2011)
- Populate indicators for a portion of the four remaining subcommittees (fisheries/aquaculture, aquatic habitat, contaminants, coastal development (on-going))
- Presentations and workshops in the region as opportunity allows for
- Identification of specific ESIP indicators which could be associated with legislative goals and/or mandates
- Reinvigorate Provincial participation in ESIP subcommittees

Strengths: More than 75 organizations participate in subcommittees. Federal funding sources (EC, DFO, EPA and USGS) provide stable platform for FY2011. 

Weaknesses: Small membership from states and provinces as well as local organizations 

Opportunities: Build stronger alliances with regional groups with similar interests and concerns 

Threats: Loss of Program Manager, to job that provides steady and reliable funding. 

Action Plan

List how program corresponds with the AP

- 1.8 Implement the Council's 'Strategy for Gulf of Maine Ecosystem Indicators and State of the Environment Reporting'

Linkages

Internal: Climate Change Network, Gulfwatch, Habitat Monitoring Subcommittee

External: Over 140 volunteers from academic, government, industry and public organizations

GULF OF MAINE MAPPING INITIATIVE

2010-2011

[Back to List of Programs](#)

HIGHLIGHTS: No funding for a coordinator position means that coordination and organization will fall to committee members, and regional collaboration will be diminished.

SECURED FUNDING

Stated in US Dollars
(Indirect Included)

Expense

| | |
|----------------------|-----------------|
| A. Coordinator | \$46,600 |
| Total Expense | \$46,600 |

Income

Total Income \$0

FUNDS NEEDED **\$46,600**

OVERVIEW

Program Description

Coordinate seafloor mapping in the Gulf of Maine, with the ultimate goal of developing benthic habitat maps from the intertidal zone to the deep subtidal for the entire GoM ecosystem. Since holding a Planning Workshop in February 2006, GOMMI has been working toward four main objectives: broaden base of support for GOMMI; Coordinate mapping efforts in the GOM; complete a pilot mapping project on Cashes Ledge; map priority areas. These objectives continue to guide GOMMI's work.

More Info

[Click to Visit Web Site](#)

Deliverables

- Updated High-Resolution Seafloor Mapping Coverage Map
- Periodic GOMMI Steering Committee Conference Calls & Call Summaries
- Facilitate Publication of Seafloor Mapping Data on GOM Biogeographical Information System
- Plan, coordinate, and seek funds GOMMI and other regional seafloor mapping projects
- Assist or coordinate data integration efforts (e.g. marine cadastre effort to integrate seafloor benthic data, Massachusetts Ocean Partnership, Gulf of Maine Biogeographical Information Systems, etc.)
- Promote mapping standards directly & through mapping coordination
- Listing of Gulf of Maine Mapping Activities
- 2010-2011 GOMMI Workplan
- Fundraising Strategy & Fundraising (private donors, foundations)

Strengths: GOMMI has a diverse and large steering committee membership. The need for seafloor mapping to guide research, management decisions, policy making, ecosystem-based management approaches, and commercial activities, and ocean development is widely recognized by all stakeholders 

Weaknesses: no sustained funding for GOMMI coordinator, securing funding to leverage or initiate seafloor mapping efforts, lack of continued representation from Canadian agencies 

Opportunities: partnership with MA seafloor mapping program thru Coastal Zone Management and Division of Marine Fisheries; advancing outcomes of 3 workshops; participating in a mapping collaborative with regional and international partners, NROC working group requests for seafloor mapping 

Threats: institutional memory difficult to maintain w. steering

committee membership shifting, lack of consistent funding for coordinator

Action Plan

List how program corresponds with the AP

- In providing baseline benthic substrate & habitat data to aid ecosystem-based management, decision making, research and monitoring, seafloor mapping supports goal #1

Linkages

Internal: every one that can benefit from seafloor mapping

External: Seafloor Mapping US Congress/NEGC request - \$1,500,000; NERACOOS, CoML, IOCM, NOAA, USGS, NRCAN, state and provincial agencies, seafloor mapping consulting, Center for Coastal and Ocean Mapping at UNH, Office of Coast Survey, National Park Service, Canadian Healthy Oceans Network, Gulf of Maine Research Institute, etc.

GULF OF MAINE TIMES

2010-2011

[Back to List of Programs](#)

HIGHLIGHTS: Public face of the Council. Broad readership base. The present funding shortfall means that only one more online edition of the Times will be produced. There is the potential for small amounts of additional funding, which may enable the Times to exist issue to issue; however, this may not be feasible based on funding uncertainty and availability of the editor.

SECURED FUNDING

Stated in US Dollars
(Indirect Included)

Expense

| | |
|---|----------|
| A. Editor (4 issues) | \$48,411 |
| Printing/mailing (4 issues - not needed if web edition B. only) | \$45,470 |

| F. ME SPO | \$2,000 |
| G. EC | \$1,500 |

Total Income \$24,332

FUNDS NEEDED \$69,549

Expenses

Expenses v. Income

OVERVIEW

Program Description

When the Times was established, the objective was to provide a newspaper that represents a transboundary voice for environmental and conservation activity within the Gulf of Maine. We are working to enhance the web presence of the Times by augmenting the content through periodic updates. While providing more information to our readers, we are hoping also to build sponsor loyalty.

More Info

[Click to Visit Web Site](#)

Deliverables

- 2 full editions of GOM Times online, periodic updates between full issues
- Encourage other publications & media to cite and reprint articles

Strengths: Signature product of GOMC. Highly effective editorial team in place. Readership of more than 10,000 throughout Gulf region.

Weaknesses: Current lack of sustainable funding sources.

Opportunities: Having a minimum of an on-line version would ensure that the Times does not stop completely.

Threats: Funding

Action Plan

- List how program corresponds with the AP
- Cross-cutting activity for the Action Plan

Linkages

Internal: Cross-committee; ESIP fact sheets; State of the Gulf of Maine theme papers

External: We communicate the activities of other organizations and agencies within the Gulf of Maine; ESIP fact sheets; State of the Gulf of Maine theme papers

Expenses v. Income

OVERVIEW

Program Description

The Gulfwatch Program collects, analyzes, and communicates data on chemical contaminants using the tissues of blue mussels (*Mytilus edulis*) to assess the distribution and levels of chemical contaminants in coastal waters in the Gulf of Maine and Bay of Fundy. It is the only marine chemical contaminant monitoring program jointly coordinated by the US and Canada across international borders. Contaminants assessed include: 24 PAHs; 22 PCBs, 16 pesticides and 9 metals, following methodologies of US-EPA and NOAA.

More Info

[Click to Visit Web Site](#)

Deliverables

- 2009 mussel tissue sampling and analysis
- Analysis and reporting on 2008 data.
- Updating of on-line Gulfwatch Interactive Mapping Tool
- Papers (2) based on 1993-2008 data analysis and interpretation

Strengths: Long-term data series; data provider for ESIP; only monitoring program of its kind in CAN/US. 

Weaknesses: Lack of funds; reliance on year-to-year government funding. 

Opportunities: Increased use by federal/state/provincial agencies for State of the Environment reporting; expand and build upon existing monitoring program to serve new clients. 

Threats: Lack of funding; Retiring committee members and no new recruits. 

Action Plan

List how program corresponds with the AP

- 2.1 Develop and disseminate tools for managers to use Gulfwatch data and analyses through partnerships with other regional efforts.
- 2.2 Continue to conduct the Gulfwatch program, integrating recommendations from the scientific program review.

Linkages

Internal: ESIP

External: NOAA Mussel Watch Program

HABITAT MONITORING

2010-2011

[Back to List of Programs](#)

HIGHLIGHTS: No funding will mean that the new web-tool will remain a pilot project, and that coordination will have to be led by participating committee members.

SECURED FUNDING

Stated in US Dollars
(Indirect Included)

Expense

| | |
|-------------------------|----------|
| A. Coordinator | \$29,150 |
| B. IT Services | \$3,500 |
| Decision Support System | |
| C. Development Contract | \$58,295 |

Total Expense \$90,945

Income

Total Income \$0

FUNDS NEEDED \$90,945

Expenses

Expenses v. Income

OVERVIEW

Program Description

The Habitat Monitoring Sub-committee facilitates regional coordination and dissemination of information on the distribution, extent, and condition of significant coastal and marine habitats. The subcommittee has developed a regional strategy for habitat monitoring and a prototype web-based tool for inputting, synthesizing, and reporting regional monitoring results. Tasks include populating the web tool with existing data on salt marsh and seagrass vegetation indicators; expanding the tool to include additional indicators of habitat integrity at multiple scales; and contributing information on regional habitat condition to the ESIP reporting tool.

More Info

Deliverables

- Summary recommendations and presentations from the workshop on Status, Trends, and Conservation of Eelgrass in Atlantic Canada and the Northeastern United States held February 2009.
- Completed web-based decision support tool for salt marsh and seagrass monitoring (contingent on securing funding)

Strengths: • Commitment of HMSC members; • strong foundation for regional coordination of habitat monitoring in a way to serve information needs of decision makers. 

Weaknesses: • Lack of paid coordinator to implement HMSC regional monitoring plans; • Lack of funds to develop the prototype web-based Regional Habitat Monitoring Data System to completion. 

Opportunities: • Development of proposals to fund completion of web-based tool for synthesizing and reporting regional habitat monitoring data. 

Threats: Lack of funds. 

Action Plan

List how program corresponds with the AP

- Directly supports AP 1.8; contributes to AP 1.23.

Linkages

Internal: • ESIP – HMSC serves as Aquatic Habitats workgroup and provides large-scale habitat indicators for ESIP tool; • HRSC, HCSC, and GOMMI

External: Many federal, state, provincial, academic, and nongovernmental organizations with interest in and responsibility for coastal habitat conservation.

HABITAT RESTORATION

2010-2011

[Back to List of Programs](#)

HIGHLIGHTS: Funding largely secured; however, some funding is still sought as recommended match for the coordinator position.

SECURED FUNDING

Stated in US Dollars
(Indirect Included)

Expense

| | |
|------------------------------|------------------|
| A. Restoration Coordinator | \$96,766 |
| B. Grant Expenditures (est.) | \$425,494 |
| Total Expense | \$522,260 |

Income

| | |
|------------------------------------|------------------|
| NOAA/NMFS III (Rest. Coordonator.) | \$86,266 |
| NOAA/NMFS III (Grant Expenditures) | \$425,494 |
| ME DOT Restoration Coordinator | \$10,500 |
| Total Income | \$522,260 |

FUNDS NEEDED **\$0**

OVERVIEW

Program Description

The Habitat Restoration Program has three major areas of focus: (1) the Habitat Restoration Subcommittee (made up of state, provincial, federal Canada & US, & NGO representatives) facilitates information sharing on habitat restoration around the Gulf; (2) develops technical guidance & informational materials on habitat restoration & restoration priorities; (3) provides funding & technical assistance to habitat restoration subaward projects throughout the Gulf of Maine & its watershed through the GOMC/NOAA Community-based Habitat Restoration Partnership Grant Program. The Grant Program is funded through a three-year competitive grant process that requires frequent & ongoing tasking & oversight from HRSC members in the Partnership.

More Info

[Click to Visit Web Site](#)

Deliverables

- Ongoing development of new restoration project concepts with community, NGO, & agency proponents throughout the Gulf of Maine region
- Under the Grant Program; Annual release of habitat restoration RFP & selection of new projects; Annual allocation of restoration funding (up to \$350k per year) for new subawards
- Completion of successful restoration projects facilitated through close engagement of grantees with GOMC-NOAA Partnership Project Teams that provide ongoing technical assistance & administrative oversight
- Development and execution of outreach efforts (materials and programming) as needed & as time allows
- Contributions to the Gulf of Maine Restoration and Conservation Initiative facilitated by HRSC involvement in the Steering Committee and work groups
- Contributions as requested to the 2012-2017 GOMC Action Plan exercise through participation in the Action Plan Work Group

Strengths: Committed team with considerable restoration/ecological expertise & strong interjurisdictional linkages 

Weaknesses: Declining non-fed. match jeopardizes fed. funding for the grant partnership; staffing constraints & workload pressures limit subcommittee activities. 

Opportunities: Promote application of well-recognized restoration principles/methods, ID common issues & engage in dialogue on emerging issues (e.g. climate change). 

Threats: Loss or diminished funding will severely reduce the ability

of the grant partnership and subcommittee to function.

Action Plan

List how program corresponds with the AP

- 1.1 Continue to administer Habitat Restoration Partnership Grants
- 1.15 Investigate options for a technical-assistance program for voluntary habitat restoration by private landowners.
- 1.2 Maintain and refine the Gulf of Maine Habitat Restoration Web Portal
- 1.4 Collaborate with the foundation community to expand support for habitat restoration activities (& identify priority issues).
- 1.8 Participate in various ESIP committees

Linkages

Internal: Habitat Restoration- Monitoring- Conservation SCs.; ESIP; Council Coordinator - Fund Development Coordinator; USGOMA Director - Financial Assistant

External: Gulfwide restoration practitioners; restoration researchers; CZM programs in ME, NH, MA; BoFEP Saltmarsh and Restricted Tidal Systems Committee.

Expenses v. Income

OVERVIEW

Program Description

Council has continued to foster innovative approaches to sharing information and enhancing collaboration within the Gulf of Maine in order to promote conservation of the Marine Environment . Separate early public GOM web browsers were unified into gulfomaine.org which was officially launched on 2 December 1998. The web services aim to provide GOM residents, businesses, commercial and recreational users, environmental stewards, managers, lawmakers and scientists with the information, tools and data needed to increase their awareness, knowledge and understanding of habitat, environmental and human health and vibrant communities within the GOM. Increased knowledge and collaboration promotes better lifestyle choices, best management practices as well as conservation, protection and restoration.

More Info

www.gulfomaine.org

Deliverables

- www.gulfomaine.org
- <http://www.gulfomaine.org/gomt/>
- http://www.gulfomaine.org/people_finder/
- http://www.gulfomaine.org/ngo_directory/
- <http://www.gulfomaine.org/news/index.php#habitatrestoration2009-2010rfp>

Strengths: This is a core funded activity. The usefulness of the technology (program) is beneficial to all sub-committees as well as to the public and managers, etc. 

Weaknesses: The core funding in place does not cover current web-services needs. Extra enhancements require extra funding resources. 

Opportunities: Sponsors to support web services components. 

Threats: Inadequate support risks web services or components becoming dormant or poorly maintained. 

Action Plan

List how program corresponds with the AP

- The Web Services Program serves the needs of all 3 goals.

SECRETARIAT

2010-2011

[Back to List of Programs](#)

HIGHLIGHTS: Critical to the functioning of Council. If all 09/10 Council dues are received and a meeting registration fee is implemented, there will be no reduction from 08/09 funding levels. Reduction in funding means less support to the host jurisdiction and a need to further reduce meeting costs.

SECURED FUNDING

OVERVIEW

Program Description

Secretariat ensures that annual processes of the Gulf of Maine Council on the Marine Environment are effectively carried out with the input and participation of the appropriate people from within the organization. Although most of this is accomplished through the efforts of various committees and contractors, the Secretariat oversees the completion of many tasks pertinent to the group as a whole. The Secretariat facilitates communication among the Council, Management and Finance, Working Group members, and sub/committees includes membership, listserves, website, meeting pages.

Deliverables

- Two Council meetings
- Four Working Group meetings
- Meeting agendas and summaries
- Annual budget
- Annual report
- TAPAS updates
- Committee/subcommittee coordination
- Annual awards program and ceremony
- Listserves, PeopleFinder, website content maintenance
- Portal for internal/external communications and responding to inquiries
- Program Deliverable

Strengths: Rotating jurisdictions strengthen cooperation and sharing of work-load; contractors with experience and institutional knowledge 

Weaknesses: Rotating jurisdictions requires considerable commitment from host jurisdiction, can't fund-raise for core services 

Opportunities: In-kind staffing of Administrative Assistant position; use of technology to ease administrative burdens 

Threats: Funding shortfall; time constraints of Secretariat chair 

Action Plan

List how program corresponds with the AP

- The Secretariat is responsible for ensuring that the Council is properly functioning and able to meet its goals as defined in the AP.

SECURING FUNDS TO IMPLEMENT COUNCIL PROGRAMS

2010-2011

[Back to List of Programs](#)

HIGHLIGHTS: Important core service given the need to raise funds for Council development priorities. Council, Working Group and Committees all have very important role in the fund development process.

SECURED FUNDING

Stated in US Dollars
(Indirect Included)

Expense

A. Development Services \$47,755

Total Expense \$47,755

Income

A. Annual Council Dues \$47,755

Total Income \$47,755

FUNDS NEEDED \$0

OVERVIEW

Program Description

The Council has identified three fund development priorities including: 1. Climate Change - focus on projects in the 2009 GOMC-NROC needs assessment 2. Ecosystem Indicators Partnership - completing current indicators and commencing work on ESIP 2.0 3. State of the Gulf Reporting - complete theme papers and implement communications initiative. The Fund Development Coordinator works collaboratively with the Working Group and Committees to articulate project goals and objectives, identify funding sources, write competitive proposals, and engage the funders in follow-up discussions.

More Info

Between January and December 2010 the Council wrote proposals for \$1.248M; raised \$660K; was declined on \$198K; and had \$362K in pending proposals

Deliverables

- At least 3-4 grant proposals; solicit 7-10 annual contributors/sponsors to support production and dissemination of the Gulf of Maine Times; Create materials describing a federal program ecosystem office.

Strengths: Working together we have demonstrated the ability to write competitive proposals and succeeded in securing funds. 

Weaknesses: Working Group and committee members are busy and it is difficult for them to help develop competitive proposals. 

Opportunities: The development of competitive ideas will increase the likelihood of securing grants. Further, some Council member organizations have development expertise that could be applied to Council fund development work. 

Threats: The weakening economy will both decrease the dollars available and increase competition for discretionary dollars; shifting currency exchange rates. 

Action Plan

- List how program corresponds with the AP
- Fund development priorities established by the Council and consistent with the Action plan

| D. Income Item | \$0 |

Total Income \$32,770

FUNDS NEEDED \$50,230

Expenses

Expenses v. Income

OVERVIEW

Program Description

State of the Gulf of Maine Report aims to provide information on priority concerns for the region that can be used for environmental management, decision-making and education. The report is a modular, living, web-based document made up of an introductory document and a series of 14 theme papers. The context document provides an overview of the Gulf of Maine particularly for those readers who are not familiar with the region. The theme papers provide a more in-depth look at important issues within the Gulf.

More Info

[Click to Visit Web Site](#)

Deliverables

- Released Gulf of Maine in Context (June 2010)
- Released Invasive Species theme paper (June 2010)
- Released 2 Climate Change theme paper (June 2010)
- Released Coastal Habitats theme paper (June 2010)
- Released Emerging Issues theme paper (June 2010)
- Launched SOG website (June 2010)
- Developed communication materials (postcard and 2 banner displays) (March 2011)
- Anticipated release Toxic Contaminants theme paper (May 2011)
- Anticipated release Microbial Pathogens and Toxins theme paper (May 2011)
- Use assessment (Dalhousie) (March 2011)
- Remaining 7 theme papers (March 2011-June 2012)
- Communications and Outreach
- Website Maintenance
- Updating the theme papers as required

Strengths: Theme papers written and reviewed by experts in and around Gulf of Maine. Increased knowledge on the State of the Gulf of Maine 

Weaknesses: 

Opportunities: Build baseline information to monitor the State of the Gulf and assess how reports influence management decisions.

Threats: Lack of funding to complete remaining theme papers and update as required. Longevity beyond 2012. 

Action Plan

List how program corresponds with the AP

- SGOM Report informs action planning process through

the identification of issues and gaps that require consideration by the Council.
