Council on the
Marine Environment**

Directions to Saint Mary's University

Walking out of the front doors of the Lord Nelson you are on South Park Street. Go south down South Park Street (away from Citadel Hill). Continue walking south until you come to Inglis Street. At this point South Park st. turns into Young Ave. Take a right up Inglis St. and walk until you come to Tower Road. Look to your left and you will see the corner of the Saint Mary's University Campus. Walk through the parking lot of the campus towards the tallest residence building (Loyola residence). The Sobey building is to the right of this building when walking from this direction. If you have any questions, just ask the friendly students once you get on campus.
